Acuitive Solutions Releases CubeCentral™ V 2.0

Expands Bid Management and Multi-Lingual Capabilities

CHARLOTTE, N.C. – February 16, 2004 - Acuitive Solutions, the leading provider of airfreight transportation management solutions for shippers, announced today the successful release and implementation of CubeCentral™ Version 2.0.

“Our customers liked what we achieved with version 1.0 - but we intend to continue setting the standards by which any airfreight related solutions are measured,” said Phil Marlowe, President of Acuitive Solutions. “So while other companies keep talking about what they still don’t have – we’ve enhanced our bid/tender management & analysis capabilities, added cross gateway multi-leg routing comparisons (through to the DC) and customer configurable multi-lingual language utilities, as well as many other incremental enhancements that add to the value we generate for our customers.”

Airfreight can cost 15-20 times more than other modes of transportation – so the impact of every decision is significant. CubeCentral™ is the only transportation management product that specifically addresses the underlying processes and workflows that support customers’ airfreight transportation programs. CubeCentral™ saves time and money by helping make critical decisions faster and more effectively.

“Shippers shy away from putting their airfreight out to tender on a regular basis because it can take weeks (or sometimes months) to manually collect, structure, and attempt to analyze the data – and even then the analysis is suspect because it is unlikely to properly account for the impact of varying DIM factors and/or accessorial charges,” Marlowe said. “The CubeCentral™ TenderManager automates the analysis and provides detailed information on the relative competitiveness of Forwarder tenders as well as year-on-year budget/spend forecasting – in minutes.”

The complete CubeCentral™ hosted suite of integrated modules includes RateManager, CubeManager, RFQManager and ApprovalManager, ConsolManager and TenderManager. All CubeCentral™ modules are available today, with annual subscription fee packages starting as low as \$30k.

Acuitive Solutions, LLC is the pioneer in innovative airfreight transportation management solutions, helping Fortune 1000 companies better manage their airfreight transportation programs.
